Join Value-Based Oncology Leaders to:

- Assess the current success of alternative oncology payment models
- Understand key components of provider readiness to accept risk in value-based contracts
- Explore potential barriers and challenges of advancing palliative care models — Consider misconceptions in defining and recommending the treatment option of palliative care in the oncology community
- Examine collaborations where payers and providers work together to make changes and become more responsive to the changing healthcare landscape and new drugs rapidly coming to market
- Evaluate the potential impact of the increase in risk-based models on patient access, outcomes and costs
- Identify the barriers and possible solutions to the adoption of precision medicine in the managed care setting
- Prepare for a mandatory alternative payment model for radiation oncology
- Discuss the impact of drug pricing legislation and rebates on value-based contracts
- Leverage big data sharing, RWE and data analytics to advance cancer care and patient outcomes
